Gene R Stark : Accidentally Green: Building an Organic Livelihood before purchasing it in order to gage whether or not it would be worth my time, and all praised *Accidentally Green: Building an Organic Livelihood*:

Do you aspire to a sustainable lifestyle? If you are passionate about organic agriculture, this book is for you. Learn the true story of two teachers who will inspire you as they and their family build their organic growing business from the ground up. Lacking capital, experience, and encouragement, they learn the nuts and bolts of production and sales;

making mistakes and relying on common sense to succeed. The culture and independent mentality of small growers is explored as the 1970's unfold and the new quest for wholesome 'green' products begins to envelop the buying public. Today's marketplace still craves the products that are earth friendly and which encourage a healthy lifestyle. This grassroots approach to business, life, and growing, still makes good sense in a new century.

About the Author Gene Stark lives and writes in rural Minnesota. He has drawn his living and inspiration from the land and people of our great heartland. He enjoys many outdoor activities including organic gardening, fishing, hunting, and skiing. Learn more about Gene and his work at www.flyovercountryscribe.com. Melissa Woods is a working artist and blogger in central Minnesota. She has dabbled in creative pursuits her whole life, from illustrating to graphic design to interior decorating. She is the mother of 3 and married to her high school sweetheart. Learn more about Melissa and her work at www.welcome-to-the-woods.com.
