Hakima Abbas, Yves Niyiragira : Aid to Africa: Redeemer or Coloniser? before purchasing it in order to gauge whether or not it would be worth my time, and all praised Aid to Africa: Redeemer or Coloniser?:

The current global economic crisis resurges the debate on aid to Africa; the largest global recipient; this comprehensive volume explores the premise, history, and foundation upon which the concept of aid is based. It considers aid's relationship to the broader development discourse in Africa, the politics and

power dynamics of aid mechanisms, and how the emergence of powers such as China and India are redefining the global aid architecture. Diverse perspectives are shown from African social commentators, academics, and activists, including Demba Moussa Dembeacute;leacute;, Patrick Bond, Samir Amin, and Charles Mutasa.

"Relevant, academically well produced and a useful addition to the debate."nbsp; mdash;Wolfgang Thomas,
University of Stellenbosch Business School
